DETAILED ACTION

Drawings

The arguments provided with respect to the drawing objections is persuasive, therefore the drawing objections have been withdrawn.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Ruderian (4,694,824).

Ruderian in a nasal spray device discloses spraying fluid into the nasal cavity without substantial penetration of the device into nostrils (Fig. 5).

Allowable Subject Matter

Claims 1-3, 11-15 and 20 are allowable over the prior art of record.

Claims 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The overall combination of spray device with the limitations of claim 1 and the spray ligament having a length of from 1 to 20 mm from the nosepiece end to the delivery end is neither anticipated nor rendered obvious by the prior art of record.

Response to Arguments

Applicant's arguments see pages 5-7, filed 08/16/02, with respect to the rejection(s) of claim(s) 11-20 under 103 have been fully considered and are persuasive.

Art Unit: 3761

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Ruderian note rejection of claim 16 above.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The balance of art is cited to show nasal inhaler devices.
